Dear readers of the article 'A physics-enabled flow restoration algorithm for sparse PIV and PTV measurements', we wish to inform you that there is a sign error in equation (1), repeated also in $\bar{e}(\bar{v})$ six lines later in the text. This is just a typographical error and was not used in calculations. All results presented are therefore correct.

The correct form of equation (1) is

$$\frac{\partial \bar{\omega}}{\partial t} + (\bar{v} \cdot \nabla) \bar{\omega} - (\bar{\omega} \cdot \nabla) \bar{v} = \nu \Delta \bar{\omega} \quad (1)$$

and the correct form of $\bar{e}(\bar{v})$ is

$$\bar{e}(\bar{v}) = \frac{\partial \bar{\omega}}{\partial t} + (\bar{v} \cdot \nabla) \bar{\omega} - (\bar{\omega} \cdot \nabla) \bar{v}.$$
